ALEJANDRO PRIETO

Devops Engineer

WORK EXPERIENCE

Devops Engineer - Evana AG

2024 Mar - current

Responsible for the design, operation, and continuous improvement of the company-wide AI platform, with a focus on infrastructure, deployment pipelines, monitoring, and operational reliability

Cloud-Native Infrastructure: Azure, Kubernetes

Security: Trivy, Azure Firewall, Azure Application Gateway

CI/CD – IaC tools: Azure Pipelines, ArgoCD, Terraform

Automation: Bash, Python, AI

Monitoring – Optimization: Prometheus, Grafana, Keda

Devops Engineer - Schumann Gmbh

2023 Jun - 2024 Feb

Responsible for the operation, and improvement of a company-owned product, with a focus on containerized workloads, provisioning of on-premises and AWS infrastructure, and automated deployments

Cloud-Native Infrastructure: AWS, Docker

Security: Trivy, Falco, Dependency-Track

CI/CD – IaC tools: Jenkins, Ansible

Automation: Bash

CTO - Mercury Cash - Freelance

2022 Jul - 2023 May

Strategic IT Leadership: Led the restructuring of the IT department to stabilize production operations and align with long-term business goals

Cloud Migration & Architecture Modernization: Led the migration from DigitalOcean to AWS and replaced legacy components with microservices-based architectures

Vendors Optimization: Reviewed IT service providers and renegotiated contracts to improve service delivery and cost alignment

Senior Fullstack Developer - Ad & Vision

2021 Feb - 2022 May

Technical lead and DevOps for web development projects

Web: Planning, development and deployment of strategic web projects for clients

DevOps: Cloud infrastructure planning using Ionos, AWS and on-premises environments

TRAINING

2024 - CKS

2023 - CKA

2022 - AWS

2022 - Azure

2011 - ISTQB: Foundation level

2009 - CISCO Networking: CCNA

2007 - Server Configuration

LANGUAGES

English ★★★★★

German ★★★★

Spanish ★★★★★

Senior Software Engineer - cm3p Gmbh

2017 Feb - 2021 Jan

Technical Lead and SDK Developer for measurement devices

Android & iOS: Implemented Bluetooth and Wi-Fi communication protocols for data exchange between measurement devices and mobile applications; supported clients during implementation

Swift / Computer Vision: Built a cross-platform computer-vision automation framework using iOS Vision, Vapor backend and OpenCV

Master Thesis - cm3p Gmbh

2015 Oct - 2016 Apr

C++, OpenCV: Developed an image comparison application using SIFT and SURF algorithms to identify and match key image features

- Benchmarking and performance optimization

Test Automation Engineer - Choucair Testing S.A

2013 Apr - 2014 Jan

- Developed test automation frameworks in Java and VB .NET
- Selenium and Silk Test
- Requirements analysis

EDUCATION

Hochschule Mannheim

2014 - 2016

Master in InformationsTechnik

Artificial Vision, Embedded Systems, Biomedical

Thesis: Integration from OpenCV on smartphone platforms: iPhone, iPad, and Android

Pontificia Universidad Javeriana

2004 - 2010

Electronic Engineering

- Digital signal and image processing
- Computer science

Thesis: Real-time algorithm for vehicle counting based on interest stripes

C++ with OpenCV

Repository: http://repository.javeriana.edu.co/handle/10554/7034
